Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. This application has been examined. Claims 1-3 are pending in this application.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gretz (USPN 6,114,630) in view of O'Neil et al. (USPN 5,373,106).

Gretz discloses the invention substantially as claimed, comprising a cylindrical leading end portion that can be inserted into said opening (46) of said junction box (44), a collar (72) positionable adjacent said outside wall surface (45) of the junction box, locking fingers (30) spreading radially axially outwardly from said leading end portion toward said collar, said locking fingers having free ends that engage said inside wall surface of said junction box when said leading end portion is inserted through said opening, whereby said wall of said junction box is captured between said collar and said free ends of said fingers, and tensioning fingers (32) adjacent to and on each side of said locking fingers, said tensioning fingers spreading radially axially outwardly from said end portion toward said collar so as to engage the edge of said opening when said end portion has been inserted therein (figs. 7-10). Gretz does not explicitly disclose two locking fingers are spaced 180 degrees apart. Gretz does disclose a plurality of locking fingers located around the connector. O'Neil, however, discloses the use of two locking fingers spaced 180 degrees apart. Therefore, it would have been obvious to

one skilled artisan at the time the invention was made to include the teaching of O'Neil in the Gretz connector in order to have a sufficient two locking fingers located 180 degrees apart from one another instead of a plurality of locking fingers as desired.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xuong M. Chung-Trans whose telephone number is (571) 272-2002. The examiner can normally be reached on Monday-Friday from 9:30am to 1:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley, can be reached on (571) 272-2008 extension 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
